DVS TECHNOLOGY
GROUP

DVS TECHNOLOGY GROUP

Driving Visions to Solutions

We develop and supply integrated manufacturing systems that intelligently combine machines, technologies, tools, automation, service, and digitalization.

Our mission: to turn ideas into tangible results—with system expertise, precision, and a deep understanding of our customers' processes.

The DVS TECHNOLOGY GROUP brings together specialized companies with a common goal: to make manufacturing more efficient, precise, and economical. With the flexibility of our subsidiaries and the strength of our centralized sales and service approach, we ensure the highest workpiece quality, maximum productivity, and long-term partnerships with customers worldwide.

Our systems are the result of experience, expertise, and clear quality standards. We manufacture key components such as spindles, honing heads, and milling heads in our own factories—for precision that we control and continuously develop.

Through digital networking and a global service network, we support our customers throughout the entire life cycle of their systems – closely, efficiently, and proactively. In this way, we combine technological visions with practical solutions that create added value in daily production.

The new board of directors of DVS Technology AG (from left to right): Uwe Kling (CEO), Uwe Rohfleisch (CFO), Rolf Rickmeyer (CRO)

“We combine vision and precision – and use them to develop solutions that move people.”

DVS TECHNOLOGY GROUP

Mechanical Engineering Driving the Future

The DVS TECHNOLOGY GROUP is home not only to some big and established names in mechanical engineering, but also new and flexible accelerators of digitalization and automation.

Together, we are the engine that drives industrial development. The synergies of our competencies enable us to achieve a level of precision in turnkey machining that makes some of the current developments possible in the first place.

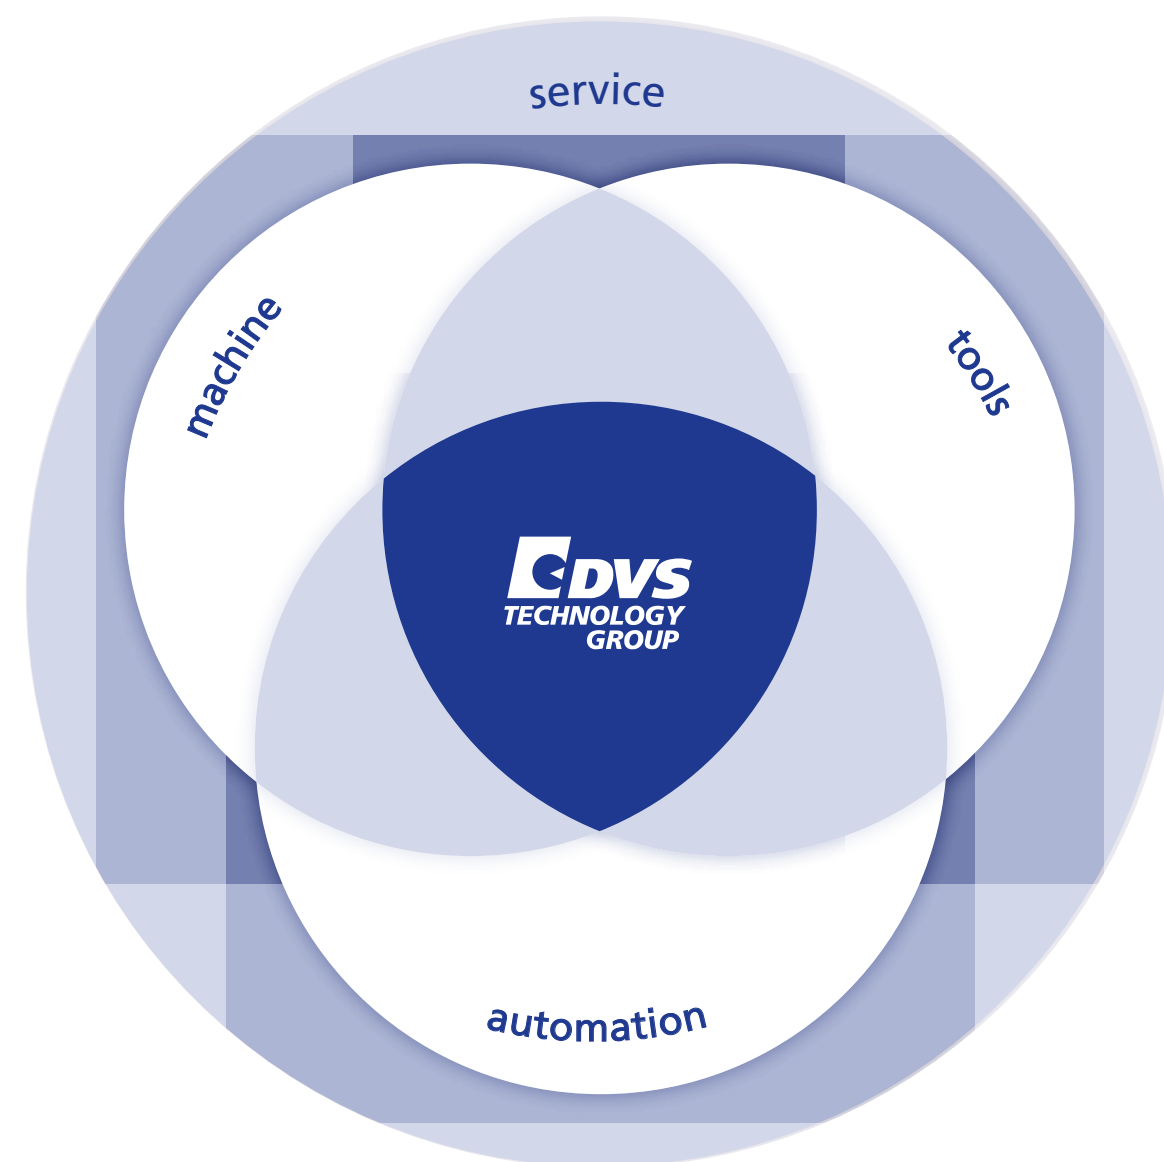

Our shared philosophy as a user-oriented solution provider successfully solves even the most complex challenges of our customers. We combine sound experience in mechanical engineering, creative ingenuity, unrivaled technical quality, and economic responsibility.

DVS TECHNOLOGY GROUP

Services and Solutions

As a group, we are more than just the sum of our parts – SYNERGY. We are a solution provider in a dynamic environment – SOLUTIONS. And many of these solutions are groundbreaking – INNOVATION.

Synergy

Combining and Leveraging Specialized Expertise

The DVS TECHNOLOGY GROUP is more than just the sum of its parts: The exchange of technology, transfer of knowledge, and our conceptualization in systems and modules yield impeccably coordinated machinery, tools, and production.

Solutions

Flexible methods and creative outlook

Innovation arises where ideas can grow and be tested in practice. Our innovative strength is based on technical expertise, a deep understanding of processes, and customer-oriented thinking. In our production facilities, challenges are turned into solutions: we combine experience with curiosity—and develop marketable, sustainable products with real added value from ideas.

Innovations

Machines make products. People create solutions.

We put ourselves in the shoes of the users, which is why we deliver more than just a machine – we support you throughout the entire life cycle before and after your acquisition, and data and information are just as important to us as steel and ceramics.

DVS TECHNOLOGY GROUP

Facts & Figures

In 1871 Naxos-Union was founded, one of the very first manufacturers of grinding machines. Diskus Werke was founded in 1911, whose disc grinding methodology is still an industry standard today. As you can see, the DVS TECHNOLOGY GROUP has always been home to some notable mechanical engineering history as well as engineering ingenuity.

The headquarters of the DVS TECHNOLOGY GROUP has been located in the Rhine-Main metropolitan region in Dietzenbach since 2016. Additional locations of the individual companies and service units of the group are located in Aßlar, Butzbach, Eschwege, Bad Camberg, Sinsheim, Schwalmstadt-Ziegenhain, Hemer, as well as in Plymouth (USA), and Taicang (PR China).

BUDERUS SCHLEIFTECHNIK

Trust through Performance

BUDERUS machinery is used when performance is the top priority.

When it comes to the hard-finishing of rotationally symmetrical components, BUDERUS Schleiftechnik is one of the leading providers of precision machinery for internal/external cylindrical and thread grinding, often in combination with hard turning.

BUDERUS technologies ensure that gears and shafts are machined down to micron accuracy for maximum precision in modern vehicle transmissions.

In addition to the manufacture of an extensive range of hard processing machines, Buderus Schleiftechnik also offers other services beyond "common" mechanical engineering. This includes contract manufacturing, wire grinding, control cabinet construction, and trading in used machinery.

"We meet the requirements of our customers with expertise, experience, flexibility, and reliability."

Alexander Neumeister
Managing Director at BUDERUS Schleiftechnik

“The enthusiasm for technology is also fueled by reliable cooperation.”

Christian Rhie
Managing Director at PITTLER T & S

PITTLER T & S

Solutions for the Future

High-precision turning, skiving, and multi-technology centers for soft and hard machining.

Ever shorter product life cycles and increasing quality requirements call for flexible, scalable solutions. With its PV and SkiveLine series, PITTLER offers multifunctional machining centers that set standards in efficiency, precision, and complete machining.

PITTLER T&S develops and manufactures high-precision turning, skiving, and multi-technology centers for soft and hard machining as well as for drilling and milling rotationally symmetrical components up to 4,000 mm in diameter.

Whether with MONO or DUO heads, the pSkive and SkiveLine series enable the use of state-of-the-art skiving processes such as rough and finish skiving, combined with turning, milling, grinding, and measuring operations.

Thanks to the transfer of know-how within the DVS TECHNOLOGY GROUP, we offer comprehensive manufacturing solutions – from machine and tool concepts to automation and series production.

PRÄWEMA ANTRIEBSTECHNIK

Cutting Edge with Precision and Technology

Market and technology leader in gear honing.

PRÄWEMA develops and produces machinery for gear machining and manufacture. The focus is on gear wheels, synchronous parts, and shafts of vehicle gearboxes. The PRÄWEMA technology portfolio comprises not only the milling of latching grooves, backings, and gearings, but also taper cutting and gear grinding.

The gear honing technology was continuously developed at PRÄWEMA until market maturity on a competitive level was reached. With over 1000 machines sold, the company is the worldwide market and technology leader.

for customers and
their visions”

Frank Götz

Managing Director at rbc robotics

RBC ROBOTICS

Modular Camera-guided Automation

rbc robotics GmbH has been a leading solution provider for camera-guided robot systems for more than two decades.

With the company’s extensive experience in a wide range of key industries, rbc robotics is well positioned to provide intelligent, automated robot solutions for manual feeding processes.

The result is higher production efficiency and productivity today and in the future. Innovative concepts require know-how: rbc robotics offers a unique set of skills, not only for processes and programming, but also in terms of economics.

With camera technology, our automation cells take the next leap: they learn to see.

DVS SERVICES & **TOOLS**

“The quality of our goals
determines the quality
of our future.”

Sandro Schäfer
Managing Director at DVS Tooling

DVS TOOLING

Tooling Solutions and Technology Support

The DVS TOOLING assortment offers every tool possible for gear honing.

With original tool solutions and worldwide technology support for PRÄWEMA gear honing, DVS TOOLING GmbH provides important added value for gear manufacturers.

The product range of DVS TOOLING covers every conceivable tool for gear honing. The core products include the PRÄWEMA ORIGINAL honing ring and the VarioSpeedDresser dressing tool.

With the specially developed “DVS LaserCut” finishing technology on the VarioSpeedDresser, DVS TOOLING is able to achieve unrivaled surface quality and profile quality of toothed components.

NAXOS-DISKUS

150 Years of Honed Quality

The grinding quality of the control gears determines the running quality of the gearbox.

NAXOS DISKUS Schleifmittelwerke GmbH was founded in Frankfurt am Main in 1871. Today, the company manufactures precision grinding tools for a wide range of applications. The products primarily comprise grinding tools for double-sided surface grinding, external cylindrical grinding, centerless grinding, and gear grinding. Depending on the application, the grinding tools are made from conventional abrasive grit through to ultra-hard cutting materials such as CBN and diamonds.

As a system partner, NAXOS works closely with DVS grinding machine manufacturers to develop individual tool solutions.

“The production standards of our group are fueled by the satisfaction of our customers.”

Mario Arnold
Managing Director at NAXOS-DISKUS

WMZ ZIEGENHAIN

Spindles for Future Mobility

Successful in mechanical engineering for 50 years.

Werkzeugmaschinenbau Ziegenhain GmbH has repositioned itself as the exclusive component supplier for the DVS TECHNOLOGY GROUP. With around 100 employees and an annual turnover of around 15 million euros, WMZ specializes in the production of precise and sophisticated machine tool components.

Our product range includes milling, grinding and workpiece spindles as well as other specialized assemblies, all of which meet strict quality standards. We do most of the manufacturing ourselves, supported by the latest DVS technology.

Our expertise allows us to respond flexibly to customer needs and develop innovative solutions. Our commitment to attention to detail, flexibility and a family working environment characterizes our role as a reliable partner within the DVS TECHNOLOGY GROUP.

build the missing parts.”

Joachim Ernst

Managing Director at DVS Service

DVS SERVICE - ON-SITE SERVICE

Efficient Industrial Service for Your Production

**Maintenance, servicing, repair, modernization
and spare parts supply.**

DVS Service GmbH is a service provider for machine tools and their modules. The company's services include all maintenance measures, servicing, repairs, modernization, and the supply of spare parts for individual assemblies or entire systems. DVS Service uses the original documents and spare parts from the manufacturers.

The company also offers various special services, including the development and optimization of processing technology and production support.

In addition to the conversion of used machinery and retrofitting of existing systems to 4.0 technologies, DVS Service also offers remote service.

Solutions Made of Steel and Data

Today's machines are networked, exchange data, and provide us with information that has enormous potential.

It is precisely these potentials that DVS DIGITAL taps into with products and services for the complexity of Industry 4.0. The DVS TECHNOLOGY GROUP is evolving from a traditional mechanical engineering company to a synergetic solution provider. DVS DIGITAL is developing the platform for it.

With the DVS DIGITAL walk-in lab, we have created an innovation space where we are developing new solutions with colleagues, customers, and experts from the industrial and digital fields. DVS DIGITAL creates a cloud-based, digital eco-system, networks machinery and production areas and works with artificial intelligence and big data in order to create the most important added value: sustainability.

“Industry 4.0 is here today. And much like its predecessors, it changes almost everything.”

Martin Preiß

Managing Director at DVS DIGITAL/ DVS SERVICE

“Quality is not a coincidence.
It is always the result
of thorough thought.”

Joachim Ernst

Managing Director at DISKUS WERKE Schleiftechnik

DISKUS WERKE SCHLEIFTECHNIK

DISKUS: Service & Tool Solutions

Maximizing Machine Uptime & Efficiency

DISKUS WERKE Schleiftechnik GmbH, founded in 1911 and based in Dietzenbach near Frankfurt, is a renowned company that today focuses exclusively on the service and tool business. As part of the DVS TECHNOLOGY GROUP, we offer first-class products and services that are used in a wide range of industries and contribute significantly to efficiency and precision in manufacturing.

Our comprehensive services, such as maintenance, repair, and retrofitting, maximize the service life of your machines. Remote diagnostics enable quick problem solving, minimize downtime, and ensure a reliable supply of spare parts. Tailor-made training and production support optimize your processes and assist your employees.

With many years of experience and a commitment to quality and innovation, we are your reliable partner for service and tool solutions in mechanical engineering.

DVS TECHNOLOGY CHINA

Quality that connects

German technology for the Chinese market

Based in Taicang, China, a major industrial center near Shanghai, DVS China coordinates all activities of the group in the fast-growing Chinese market. As the central point of contact for sales, project management, commissioning, and technical support, it strengthens the DVS GROUP's presence in China in the long term. State-of-the-art processing technologies and the entire range of machines and solutions offered by the group of companies are used specifically to meet the requirements of local industry.
