

FULL TIME / PLYMOUTH, MICHIGAN (USA)

## Service Technician/ Commissioning Engineer (m/w/n)

The DVS TECHNOLOGY GROUP is an association of 14 renowned companies with core competencies in the construction of machine tools and special machines as well as the production of abrasives. We owe our leading market position and our worldwide success mainly to our motivated employees and forward-looking innovations. DVS Technology America, Inc. is a sales and service company of the DVS TECHNOLOGY GROUP. From Plymouth, we distribute machines and machine components of the DVS companies BUDERUS Schleiftechnik, DISKUS WERKE Schleiftechnik, PRÄWEMA Antriebstechnik, PITTLER T&S and WMZ throughout the USA. In close coordination with the colleagues of the individual DVS companies in Germany, we look after our American customers from project planning and machine construction to repair and maintenance. We have set our focus in this area with close proximity to the automotive and supplier industry in North America.

### Your tasks, among others:

- + Installation, commissioning and final acceptance of various DVS machines
- + Technical customer advice and support. Site supervision
- + Overhaul and repair of machines and machine components
- + Performing machine training and instruction for customers and other DVS employees
- + Preparation of service reports

### Your profile:

- + Training as an industrial mechanic, mechatronics engineer or machining technician or mechanic
- + At least two years of relevant work experience
- + Sound machine knowledge in the areas of turning, gear cutting, grinding and/or honing
- + Ideally experience in international service deployment
- + Independent working style and willingness to work in a team
- + Good command of English
- + Willingness to travel and valid car driving licence
