

FULL TIME / BAD CAMBERG

Robot Programmer & Commissioning Engineer (m/f/n)

rbc robotics GmbH, based in Bad Camberg, is part of the DVS Technology Group. From its headquarters there, around 50 employees develop and produce robot modules and automation solutions for the global market. We develop, design and implement innovative, intelligent robot solutions and thus have our finger on the industry's pulse.

Your tasks, among others:

We would like to strengthen our team and are therefore looking for a personality for the area of robot programming. This involves the creation of sequence programmes and the adaptation of our standards. This includes, among other things, the commissioning of our robot systems or the elimination of system down-times at our premises, at the customer's site or via remote maintenance. You are welcome to contribute your ideas and measures for process optimisation at any time. After successful commissioning, operator training is provided on our systems and plants.

Your profile:

- + Completed vocational training or studies in the field of electrical engineering or mechatronics
- + Preferably further training as a technician, master craftsman, engineer or comparable qualifications
- + Programming knowledge and experience with common robot systems such as KUKA, ABB, Fanuc
- + Creativity, initiative and team spirit
- + High willingness to travel, driving licence class B
- + Friendly, confident and competent appearance
- + Open-minded attitude towards permanent process optimisation

What we offer:

- + Security through a permanent job
- + Varied activities with sustainable opportunities for further training
- + National and international business trips
- + A flexible working time model
- + A committed and helpful team
