

FULL TIME / SINSHEIM

## Service Technician Field Service Electrical Engineering (m/f/n)

With over 20 years of experience in machine and component construction, Werkzeugmaschinenbau Sinsheim GmbH (WMS) is the SERVICE department of the DVS TECHNOLOGY GROUP. We are a medium-sized company based in Sinsheim. Our core competence is component repair and machine overhaul/retrofit with new value guarantee. In addition to maintenance work and the sale of spare parts, we offer our (inter)national customers everything to do with machine tools. Our high-performance and motivated team is characterised by well-founded specialist knowledge, pronounced quality awareness with a passion for precision.

### Your tasks, among others:

- ✚ Assembly and conversion of machines and machine components, predominantly turning/milling machining centres, at our international customers' sites
- ✚ Analysis and elimination of occurring faults and their repair at the customer's site
- ✚ Commissioning of devices and complete in-house machine controls, as well as at our customers' sites
- ✚ Networking of individual machines and complete systems on our own initiative
- ✚ Correct documentation of the services rendered
- ✚ Technical advice and development of digital service products

### Your profile:

- ✚ Completed vocational training in the field of electronics technician/mechatronics technician, technician training in the field of electrical engineering/mechatronics or a degree/university degree in a comparable field
- ✚ Relevant professional experience in mechanical engineering, ideally in field service
- ✚ Expertise in network technology, IP connections of remote maintenance solutions via cloud applications
- ✚ Programming of Siemens controls

### What we offer:

- ✚ Employment contract
- ✚ Company car, job bike, mobile phone
- ✚ Individual further training offer
