

FULL TIME / BERLIN

Field Service Technician Mechanics in Berlin (m/f/n)

With over 20 years of experience in machine and component construction, Werkzeugmaschinenbau Sinsheim GmbH (WMS) is the SERVICE department of the DVS TECHNOLOGY GROUP. We are a medium-sized company based in Sinsheim. Our core competence is component repair and machine overhaul/retrofit with new value guarantee. In addition to maintenance work and the sale of spare parts, we offer our (inter)national customers everything to do with machine tools. Our high-performance and motivated team is characterised by well-founded specialist knowledge, pronounced quality awareness with a passion for precision.

Your tasks, among others:

- + Assembly and conversions of machines and machine components, at our (inter)national national customers on site
- + Main assignment at one of our customers in Berlin
- + Analysis and elimination of occurring faults and repair on site
- + Commissioning of machines and systems as well as documentation of services rendered
- + Carrying out of inspections and planned maintenance measures
- + Retrofitting of complete machine control systems in-house and at the customer's site
- + Technical advice

Your profile:

- + Completed vocational training as an industrial mechanic or equivalent vocational training in the field of hydraulics and pneumatics/control technology (motor vehicle mechatronics technician, mechatronics technician etc.)
- + Relevant work experience, ideally in field service
- + Confident handling and reading of construction drawings and electrical/fluid plans
- + Independent and quality-conscious work style
- + Car driving licence and willingness to travel worldwide

What we offer:

- + Employment contract
- + Company car, job bike, mobile phone
- + Individual further training offer
